## Selected first results of the $53^{r d}$ Reiseanalyse

The Forschungsgemeinschaft Urlaub und Reisen e.V. (FUR) is pleased to announce key results from the current Reiseanalyse 2023.
The Reiseanalyse, which has been conducted annually for more than 50 years, is considered the most detailed study on German holiday travel demand. The FUR is a neutral, non-commercial interest group of tourism research users.

## 2022: Almost back to pre-pandemic levels

In 2022, 67 million holiday trips (5+ days) took place, 22\% more than in the previous year and only $5 \%$ less than in 2019. Total expenditure on these trips rose to a new record high of $€ 80$ billion.
Regarding the destinations, the shares are almost 'as usual': $27 \%$ of trips were domestic, $73 \%$ went abroad. Abroad, Spain dominates ahead of Italy, Turkey, Austria and Greece. This was accompanied by a noticeable growth in air travel, hotel accommodation and package tours - all well above the level of 2021, but not quite at the same level as 2019. Booking channels follow the long-term trend towards digital: For the first time, 50\% of trips were booked online in 2022.
After the two pandemic years, the key data for 2022 show holiday behaviour very similar to before the pandemic.

## 2023: Good prospects despite crises

The first look at the demand-side conditions for 2023 is comparatively bleak: The assessment of the economic situation is more negative than ever before and the confidence of having enough money for holiday travel in 2023 is significantly lower than in previous years.
On the other hand, the high value of holiday travel as a consumer good is confirmed, and the more specific people are asked about their travel plans for 2023, the better the outlook becomes: $70 \%$ of the population certainly plan a holiday trip in 2023, $18 \%$ are uncertain and only $13 \%$ are not planning a trip. These values are at the same level as before the pandemic.
A high demand for holiday travel in 2023 is quite possible and not unlikely - at the same time, the market risks are clearly visible but difficult to quantify in terms of their impact.

Review 2022:
Almost back to pre-pandemic levels

VOLUME OF HOLIDAY TRAVEL IN 2022:
Travellers \& travel still below 2019, spending at record high

Holiday travel in 2022 (5+ days)
Holiday travel propensity (the proportion of people who have gone on at least one holiday trip in 2022) was $75 \%$. This corresponds to a volume of 53.1 million people. This value has increased compared to the year before (68\%) and is now slightly below the 2019 level ( $78 \%$ ). The same applies to the value of 67.1 million holiday trips in 2022. In terms of travel expenditure, 2022 was a record year: At $€ 80.1$ billion, the overall expenditure was more than $€ 7$ billion higher than in 2019.

Short breaks 2022 (2-4 days)
Key data for the segment of short breaks (of 14 to 75 year-olds) in 2022 show 77 million short breaks and a total expenditure of $€ 27$ billion. Thus, there were slightly fewer short breaks than in 2019, but a new record for travel expenditure.

Destinations DOMESTIC

## Destinations ABROAD

[^0]Market shares domestic vs. abroad After the strong market share losses of destinations abroad in 2020 and 2021, 2022 shows conditions as before the pandemic: $73 \%$ of all holiday trips went abroad in 2022 (2019: 74\%).

Domestic vs. foreign holiday volume For destinations abroad, this means an increase of more than 14 million holiday trips compared to the previous year. The volume of trips abroad is only slightly below the level of 2019.

Germany is by far the No. 1 destination with a share of $27 \%$. Compared to 2021, there is a decline of over 2 million trips. This means that the current figure is just below that of 2019.

Of the short breaks (2-4 days duration), almost $80 \%$ went to Germany in 2022, similar to 2019.

DESTINATIONS FOR HOLIDAY TRAVEL IN 2022:
Spain is top abroad, Bavaria is top within Germany

Domestic destinations
The ranking of the German federal states with the highest demand is familiar: Bavaria ahead of Mecklenburg-Western Pomerania, Schleswig-Holstein, Lower Saxony and Baden-Württemberg. The market shares of most the destinations are similar to those before the pandemic.

Destinations abroad
The ranking of destinations abroad is also the same as in 2019: Spain ahead of Italy, Turkey, Austria and Greece. Turkey was able to increase market shares, while Spain, Italy and Greece achieved similar figures as before the pandemic.

[^1]
## HOLIDAY TRAVEL BEHAVIOUR IN 2022:

## More car and holiday home trips compared to 2019

| Means of transport |  | Accommodation |  |  |
| :---: | :---: | :---: | :---: | :---: |
| $\begin{array}{r} \text { Car } \\ \text { Camper } \end{array}$ | 46,0\% | Hotel B\&B |  | $52,8 \%$$52,6 \%$ |
|  | 43,5\% |  |  |  |
| Plane | $\begin{aligned} & 41,9 \% \\ & 42,4 \% \end{aligned}$ | Holiday apartment home | 26,3\% |  |
|  |  |  |  |  |
| Train | 5,5\%$5.5 \%$ | Camping | 6,0\% |  |
|  |  |  | 5,8\% |  |
| Coach | 4,2\% | Friends \& family | 10,4\% |  |
|  | 5,9\% |  | 11,5\% |  |
| Other | - 2022 | Other | 4,5\% | - 2020 |
|  | - 2019 |  | 6,6\% | -2019 |

[^2]
## Mode of transport

The significant recovery in air travel (+9 million more holiday trips than in 2021) fits with the dynamics of the destinations. But the level of 2019 is not reached, yet.

## Accommodation

The development in accommodation corresponds to the general market development. Particularly, hotels are catching up and are now at the same level as in 2019, while shares of holiday apartments/homes are even higher.

Trip duration and expenditure The duration of trips in 2022 was 12.6 days on average. This is significantly longer than in the Corona-years and slightly longer than in 2019 (12.4 days).

More than ever before was spent per person and trip in 2022, on average $€ 1,194$ (2021: €1,017; 2020: €892; 2019: €1,032).

ORGANISATION \& BOOKING FOR HOLIDAY TRAVEL 2022: Package holidays in the lead again, online bookings dominate

| Organisation |  |  | Booking channel* |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Packaged tour or modular holiday |  | 43,3\% | Online |  | 49,6\% |
|  |  | 45,1\% |  |  | 44,0\% |
| Accommodation separately booked | 37,7\% |  | Face-to-face |  | 36,1\% |
|  |  |  |  |  | 39,0\% |
| Ticket <br> separately booked | 14,4\% |  | By telephone | 12,2\% |  |
|  | 14,6\% |  |  | 15,2\% |  |
| Other components separately booked | 5,6\% |  | Via e-Mail |  |  |
|  | 8,4\% |  |  | 10,4 |  |
| Nothing booked in advance | 11,4\% | $\square 2022$ | Via letter/fax | 0,6\% | $\square 2022$ |
|  | 11,6\% | $\square 2019$ |  | 1,4\% | - 2019 |

## Holiday organisation

In connection with the more frequent choice of destinations in the Mediterranean region, the number of package tours has increased significantly in 2022 compared to the previous year. Compared to 2019, there are slightly fewer package tours and slightly more direct accommodation bookings.

Booking channels For the first time, around $50 \%$ of all holiday trips are booked online in 2022. A good third of all holiday trips are booked face-to-face.

For both booking channels, the current figures confirm the long-term trends: Online bookings are continuously gaining market shares, while face-to-face booking is losing shares.

## Outlook 2023:

A good tourism year despite crises?

## ASSESSMENT OF THE ECONOMIC SITUATION

## Comparatively bleak prospects for 2023

Assessment of the economic situation With regard to the general economic development, expectations have darkened considerably compared to January 2022. $50 \%$ of the population expect a deterioration in the coming 12 months.

Even more important for holiday demand is the view of the personal economic situation: The vast majority, namely $59 \%$ (previous year 69\%), expect no change. 11\% (previous year 14\%) expect an improvement, 30\% (previous year 18\%) suspect a deterioration.

Although this is the most negative outlook on the personal economic situation in the past decade, $70 \%$ of the population have a stable or even positive outlook.

MONEY, TIME, DESIRE TO TRAVEL 2023: Declines compared to the previous year, but still a good starting point

Starting conditions for 2023
Whether someone actually takes a trip is a question of ability (time and money?) and willingness (desire to go on holiday?). After the record values for 2022, the outlook for 2023 is a little more restrained: 66\% say they will have enough time for holidays, $55 \%$ state that they have enough money and the desire to go on holiday. Especially when it comes to money, the confidence in one's own possibilities has noticeably decreased compared to the previous year.

- Nov. 2019 (for 2020)
- Nov. 2020 (for 2021)
$■$ Nov. 2021 (for 2022)
$■$ Nov. 2022 (for 2023)

TRAVEL PLANS 2023:

## Most people already have definite plans for holiday trips

Status of holiday plans in January 2023 Despite the comparatively negative outlook on the economic situation and travel requirements (time, money, desire), Germans' holiday plans are very positive:
$70 \%$ of the population are certain to travel in 2023: For $35 \%$ the destination is already fixed, for $35 \%$ the destination is not certain, yet. These are good conditions for a successful tourism year in 2023.

With $18 \%$, the proportion of the unsure is at the same level as before the pandemic, and the number of those who are not planning a holiday trip in 2023 is only slightly higher (13\%) than at the beginning of 2020.

## Holiday motives

The general holiday motives show that there are many good reasons for the German population to go on holiday. People long for getting away from daily routine, for sun, for fun, relaxation, recuperation, time together and spoiling themselves. The average number of motives mentioned rises from 10.4 at the beginning of 2020 to 11.1 in January 2023.

## Interest in types of holidays

The results also show an increasing interest in many types of holidays. These match the motives expressed: relaxation, swimming, family holidays, city holidays and nature holidays. The overall picture of motives and holiday forms is thus very stable despite all crises.

## Information about the Reiseanalyse

The Reiseanalyse (RA) has been studying the travel behaviour of the German population for over 50 years. Several population-representative surveys (face-to-face and online) are conducted annually with a total of more than 13,000 respondents.

The Reiseanalyse is a participation survey, the costs of which are shared by the partners of the RA. A basic participation is a prerequisite for using the results of our investigations. Depending on the area of application, the basic scope of participation can be supplemented and individualised with further modules and extensions.

Partners of the Reiseanalyse include national and international DMOs, tour operators, transport companies, but also public institutions, associations and universities.

All details on the Reiseanalyse and your participation options at www.reiseanalyse.de

## As a partner of the RA you will receive information on:

| Holiday travel experience | Travel behaviour last | Travel intentions and |
| :---: | :---: | :---: |
| of the last 3 years | year | Holiday interests |
| for 80 destinations, | All about holidays | 80 destinations, |
| 25 holiday types \& 15 activities | and short breaks | 25 types of holiday |

Detailed socio-demographics, holiday motives, internet use

## Optional extensions:

| Main topics | Own questions in the <br> surveys | Exclusive/additional <br> questions |

## Reiseanalyse Trend Study 2030

 incl. UpdatesHoliday demand in the source market Germany
In October 2020, the fifth edition of the Reiseanalyse Trend Study was published. The Trend Study describes the long-term development of the demand side of holiday tourism in Germany, from the early 1970s to the year 2030 .
In the meantime, two updates have been published that include the effects of the pandemic and the current crises on travel behaviour.

The basis for the updates were more extensive findings from several surveys within the framework of the Reiseanalyse as well as findings from scientific publications.

ISBN Trend Study 2030: 978-3-949752-04-9

## RA 2022: Summary of the results

Structure and development of demand for holiday travel

The annual summary of the Reiseanalyse focuses on a detailed summary of the key findings of our most recent research. The latest edition deals with the findings on travel behaviour in the travel year 2021.
In addition to selected results, time series and comparisons with the previous year, the summary also contains evaluations of short holiday trips by the German-speaking population.
A short version of the RA 2023 will be published in autumn 2023.
